OUR LEARNING CLUB

My maths workbook

Primary One / Opening chapters / An adult can read with you.

My name: _____

Look at the textbook model first.
Find the same chapter name in this workbook.
Then try the task here.

You can point, speak or use real objects before writing.
Your teacher can show you where to begin.
It is fine to try again.

Keep writing and drawing on these workbook pages.
Keep the textbook clean for another learner.

ONE TO FIVE / YOUR TURN

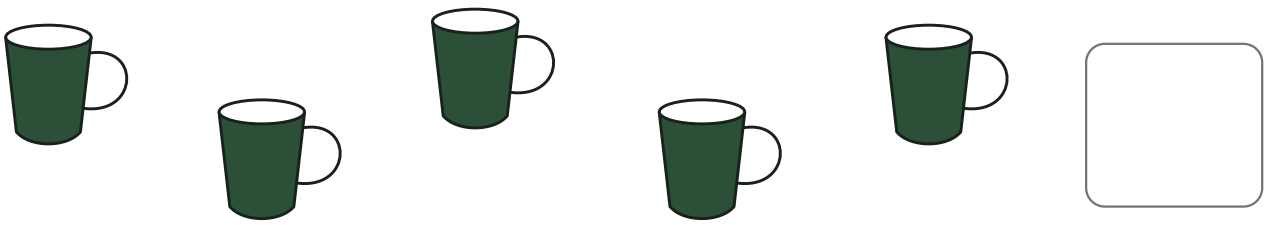

Count and draw

Look at the textbook models first. Write and draw on this page.

Touch each cup once. Count aloud.
Write how many in the small box.

Count this scattered group.
Write how many in the small box.

Draw two circles in the large box.
A circle can stand for each cup.

ONE TO FIVE / WATCH, THEN PRACTISE

Trace and write

Watch your teacher form each numeral on paper first.

Trace each light numeral. Then write it in the empty box beside it. Work from the top row down.

1	1	
2	2	
3	3	
4	4	
5	5	

Now say the numerals in order. Try again on paper if you need to.

ONE TO FIVE / REMEMBER AND HELP

Show how you count

Try to remember Mrs Binta before looking back.

Show four fingers. Count them.
Write how many in the box. You can use four objects instead.

Adamu: I touched a cup twice.
Show a partner how to count each cup just once.

Tell or show your counting method. You can draw your idea below.

ONE TO FIVE / A FRESH TRY

A fresh counting try

An adult reads these instructions. Try before getting help.

Ask an adult to say a number from one to five.
Make that many large objects at the table.
Count once to check.

Ask the adult to say another number.
Draw that many circles in the large box.

Point to the numeral the adult says.
Then the adult points to a mixed card.
Say its number. Try a different order next.

3	1	5	2	4

SORT, MATCH AND ORDER / TRY TOGETHER

Sort and match

Watch Mr Aliyu first. You may mark this workbook.

Mr Aliyu circled one leaf. Circle the other leaf.
Leave the tops without circles.

Mix real leaves and tops at the table. Sort them into two groups. Count each group. Tell your partner the rule.

Draw one line from each top in the upper row to a different top below.
Does every top have a partner?

Tell your partner: more, fewer, or the same number?

SORT, MATCH AND ORDER / YOUR TURN

Order and draw

Think about the number in each set.

Write these numbers from smallest to largest: **4, 1, 3.**

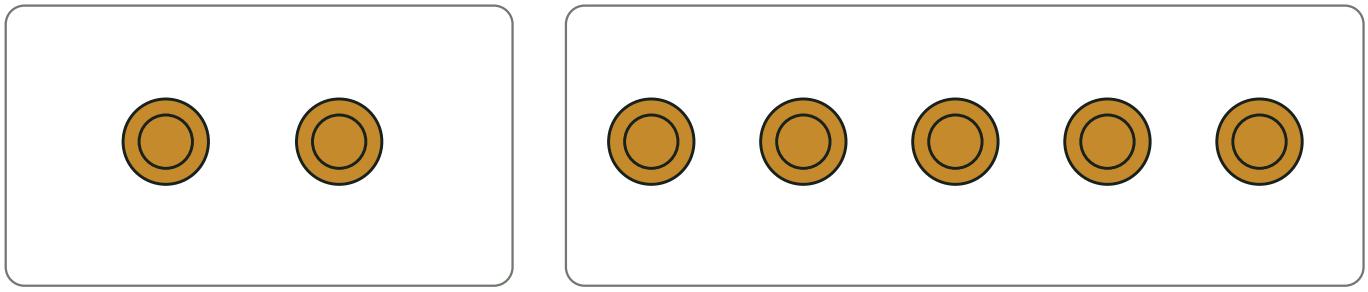

Draw **1** dot in the left box.
Draw **3** dots in the right box.

SORT, MATCH AND ORDER / YOUR TURN

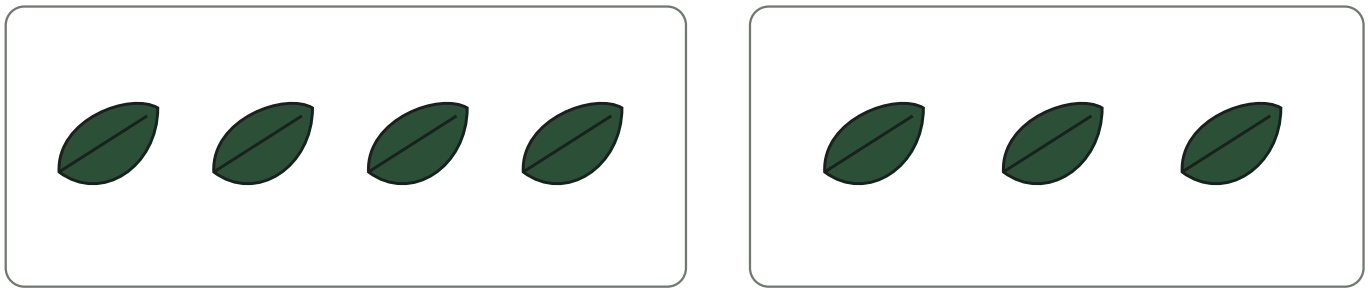

More and fewer

Use matching or counting. Try these on your own.

Mr Aliyu: Point to the set with more tops.
Circle that whole set.

Point to the set with fewer leaves.
Circle that whole set.

John: I want to try before a hint.
Mr Aliyu: Take your time. When you finish, tell me how you checked.

SORT, MATCH AND ORDER / REMEMBER

Show how you compare

Try to remember Mr Aliyu before looking back.

Tell or show a partner how to compare two sets.
Use real tops or draw your idea below.

Make a set of **5** large objects on the table.
Ask your partner to check. Swap roles.

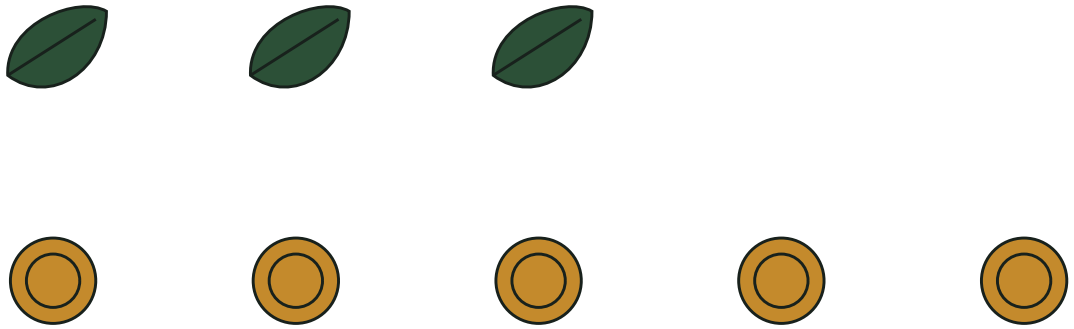

Adamu: Your turn, then mine!
Give your partner time to think.

SORT, MATCH AND ORDER / A FRESH TRY

Ready for our game

Use what you have learned to finish tidying the toy shop.

Mr Aliyu: We sorted our game tray. Match each leaf to a different top. Draw the lines.

John: Point to the set with more.
Aishatu: Each leaf is a ticket for one top. Use real pieces. Put the tops with no partner in a spare box at the table.
Grace: The two spare tops are away. Now the tray is tidy.
Adamu: We can take fair turns at our game!

A fresh try. Work on your own.
Circle every leaf below. Leave the tops without circles.

Which set has more? Circle that whole set.
