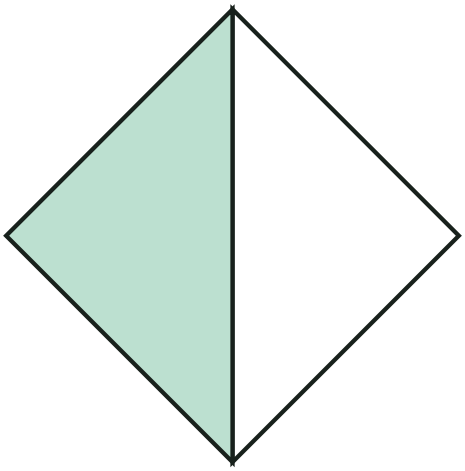
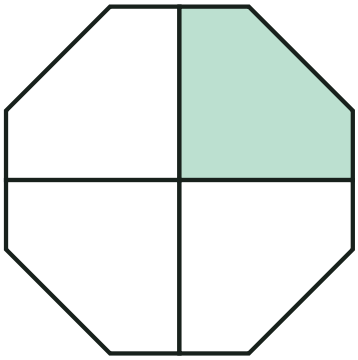
CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

# Check the parts

Try together / Match with textbook pages Check the amount and Turn it.

Read after the teacher models. Name each shaded part aloud. Say how you know. The tilted shape is a square. The other shape is a paper orange model.





Look at the two rectangles below. Is each divided into halves? Say yes or no. Explain. An adult may write your words in the space.

CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

# Remember the parts

Read together. Say, point or use your workbook or exercise book.

Work on your own. Write each answer in the space below it. An adult may read the words. You may say the answer for an adult to record.

How many equal parts make halves?

How many equal parts make quarters?

Draw two equal halves of a rectangle. Use the space below.

CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

# Draw and explain

Read together. Say, point or use your workbook or exercise book.

Draw a square and shade one quarter. Use the space below.

Are 2 unequal pieces halves? Write or say your answer.

Explain why your shaded part is a quarter. Say it or write here.

CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

# Fold, check and retry

Read together. Say, point or use your workbook or exercise book.

For help, fold a scrap rectangle with an adult. Match the edges. Open and check the equal halves. Fold a square twice in different directions. Open and touch one quarter.

Now work alone with new scrap paper. Fold a tall rectangle into equal halves. Fold a new square into equal quarters. Point to one part of each. Say its name and explain how you checked.

Draw your new folds here, or keep your folded papers with this workbook. An adult may record your explanation.

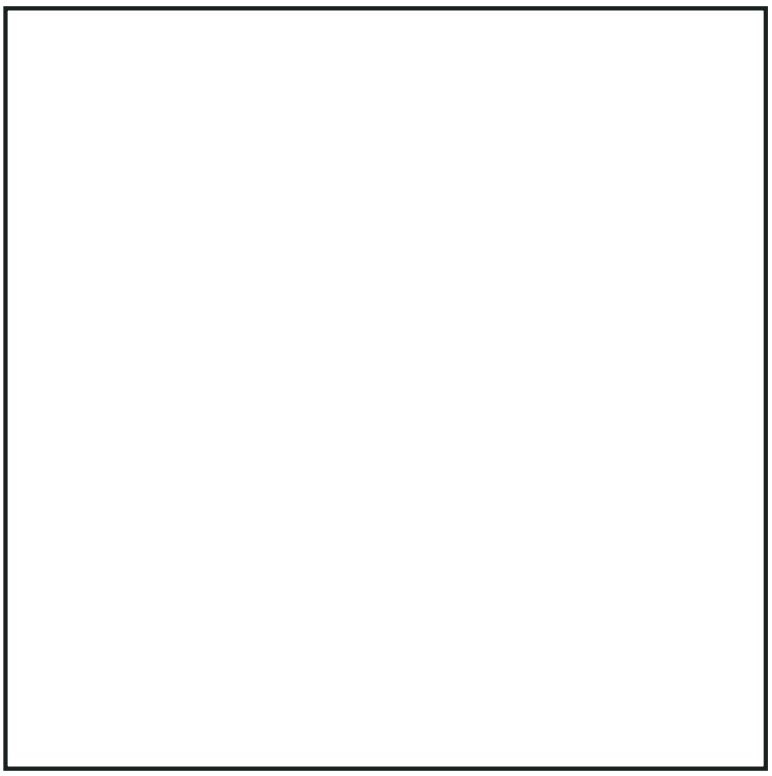
If ready, show a different way to make equal halves of a square on spare paper.

CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

# Our fair display

Read together. Say, point or use your workbook or exercise book.

Aishatu needs a paper mat with the same space for each friend. Divide this whole square into four equal parts. Put one drawing or name in each part: Aishatu, Adamu, Grace and John.



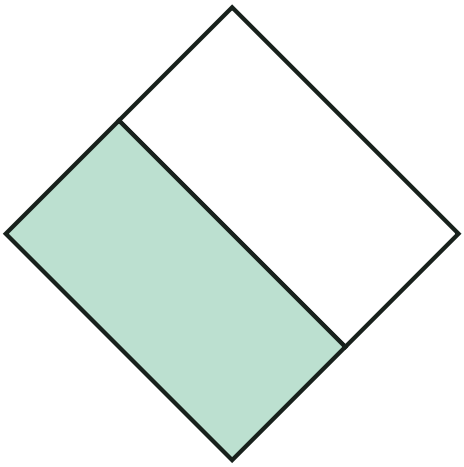
Say why each part is a quarter. Explain how the mat gives everyone the same amount of space. An adult may record your words here.

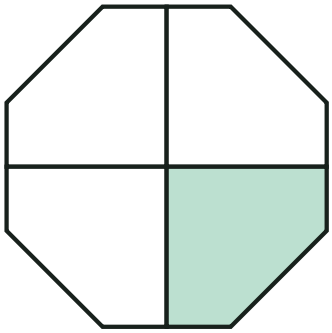
CHAPTER SEVEN / EQUAL HALVES AND QUARTERS

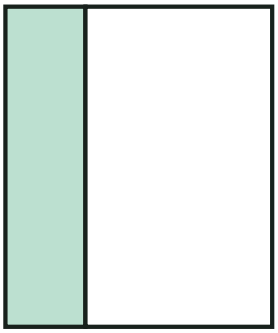
# A fresh check

Read together. Say, point or use your workbook or exercise book.

Work alone. Name the shaded part of each whole: half, quarter, or neither. Write each name below it, or say it for an adult to record. Explain using equal parts.







Draw a whole divided into four equal parts. Shade one quarter. Explain why it is a quarter.

Without looking back, tell an adult what a half is and what a quarter is.
