WELCOME TO OUR LEARNING CLUB

Meet your new friends

Count. Explore. Discover. An adult can read with you.

Aishatu

The box-toy builder

I'm Aishatu from Gombe. My cousins and I make toy shops from old boxes.

I like building things and trying new ideas.

I don't like long waits. Let's make something!

Adamu

The game storyteller

I'm Adamu. My family is from Dukku. My cousins turn my funny stories into games.

I like stories and fair turns.

I don't like anyone being left out. Come and play!

What do you like to make or play?

WELCOME TO OUR LEARNING CLUB

More friends to meet

Count. Explore. Discover. An adult can read with you.

Grace

The notebook explorer

I'm Grace. My family is from Billiri. Grandfather and I keep a discovery notebook.

I like neat drawings and tiny details.

I don't like smudges. But I can try again!

John

The puzzle-map maker

I'm John. My family is from Yamaltu/Deba. I make puzzle maps for my cousins.

I use a wheelchair. I like drawing secret paths.

I don't like answers before I've had a try!

You belong here too. Let's learn and help one another.

MEET THE GROWN-UPS IN OUR CLUB

Meet your teachers

Two friendly guides for our learning club.

Mrs Binta

Big ideas. Brave little tries.

Hello! I'm Mrs Binta. I turn everyday things into maths games. I like curious questions and brave tries. In my class, a mistake is a chance to learn. Bring your ideas!

Mr Aliyu

Riddles, games and discoveries.

Hello! I'm Mr Aliyu. I enjoy number riddles and building games. I like asking, 'How did you know?' We will learn together in our next chapter. I can't wait to hear your ideas!

You can ask questions, try an idea and have another go.

COME INTO OUR CLASSROOM

Aishatu's toy tea shop

Aishatu, Adamu, Grace and John are ready to learn together.

Mrs Binta: Let's help Aishatu set up her pretend tea shop. We must count the cups.

Aishatu: I can't wait to open it!

Adamu: Can everyone have a turn?

Mrs Binta: Yes. We will take turns and help each other.

Grace: I'll make a neat cup record.

John: Make it a puzzle! Let me try before you tell me.

Join the club: what could help us count every cup just once?

WATCH ME

Learn with Mrs Binta

One to five / Watch your teacher before you try.

Mrs Binta: I know you're eager, Aishatu. Let's count before we open the shop.

Aishatu: I'll slow down and touch each cup once!

Mrs Binta: Ask an adult to put some large, unbreakable cups on a table.

Aishatu: I can't wait to open my shop! Count along with me.

Watch Aishatu. Count with her.

Aishatu: Watch me touch each cup once. Listen: one, two, three.

one

two

three

Aishatu: There are three cups!
Mrs Binta: Yes. Three is the last number we said.

Remember what Mrs Binta does

Touch one. Say one number.

LET'S TRY

Count with Mrs Binta

Touch a cup picture and say one number at the same time.

Mrs Binta: A smudge is okay, Grace. Let's check your cup record.

Grace: I'll count again and fix it. Join me!

Touch and count the cups	Say	Number
	one	1
	two	2
	three	3
	four	4
	five	5

Grace: I can fix my record. Let's count real cups with a partner.

YOUR TURN

Count with your friends

Mrs Binta reads each task. Join the children and try it.

Aishatu's shop cups

Aishatu: Help stock my toy shop. Touch each cup once. Write how many.

Grace checks her record

Grace: A smudge! Help me count these cups. Write how many.

John's picture puzzle

John: My puzzle needs a circle for each cup. Draw two circles.

Mrs Binta: Take your time, John.
A circle can stand for a cup.
Draw your circles here.

REMEMBER AND TRY

Write and show

First remember the counting. Then try the writing.

Mrs Binta: Try this puzzle, John. How can a written number show a cup count?

John: Don't tell me yet! Let me count first.

Grace has another try

Grace: My first try need not be perfect. Trace, then write.

1	2	3	4	5
_____	_____	_____	_____	_____

John tries before a hint

John: No hints yet! Show four fingers. Count. Write how many.

How many? ☐

Mrs Binta: Take time to try. You can show cups instead.
John: Now let's compare our answers!

REMEMBER AND HELP

Help Adamu count

Try to remember before looking back at the teacher's example.

Mrs Binta: Everyone gets a turn, Adamu. What will help you count?

Adamu: I rushed my story and touched a cup twice. May I try again?

Adamu gets another turn

Adamu: I touched one cup twice. Help me try again.

Touch each cup once. Count aloud.
How many cups are there?

Need a reminder? Touch one. Say one number.

The club is ready to check

Mrs Binta: Put four cups on the table for our club.
Aishatu: Ask a partner to name a number below. Point to it.

3	1	5	2	4

FOR THE TEACHER

Teach, notice and return

Mrs Binta leads this chapter; Mr Aliyu is introduced for the next.

Start with real objects. Use five large, clean, unbreakable cups. Read pupil text aloud. Demonstrate slowly with a fresh set of three: one touch and one number word per cup, then state the total. Introduce the cup pictures and numeral column afterwards. Do not require pupils to read task labels or remember a slogan before modelling.

Recall through action. On the later pages, first ask what Mrs Binta showed them and invite a demonstration. Wait for a response. If needed, model again and practise together. Observe counting, stating the total and recognising numerals separately from handwriting. Read character exchanges with the class; let pupils take roles and demonstrate. Aishatu practises patience; Adamu asks for fair turns; Grace repairs a smudged record; John asks for thinking time. Speaking, pointing or moving objects are valid responses.

Answer and assessment map (adult IDs only)

P1-01-Q1 / Count the row: Three cups; one touch and one number word per cup.

P1-01-Q2 / Count this group: Five cups, despite their different positions.

P1-01-Q3 / Draw to show how many: Two separate circles, one for each cup picture.

P1-01-Q4 / Write the numbers: The numerals one to five in order; observe independent formation separately from tracing.

P1-01-Q5 / Show with your hand: Four fingers and the numeral 4. Accept a set of four objects if a hand response is unsuitable.

P1-01-Q6 / Help Adamu start again: Touch or move each cup exactly once, say one number per cup, and state three cups. Explain or demonstrate without requiring written prose.

If a child struggles
Skips or repeats: line up the cups; move each counted cup aside. Recheck with a fresh small set.
Cannot state the total: repeat the last number, then ask how many altogether.
Copies but cannot recognise: match cups to a numeral, shuffle the cards and ask again.

Fresh check: ask for four cups, without a model. Name one shuffled numeral at a time. Record independent / with help / not yet. **Later:** On another day ask what Mrs Binta showed the class. Invite a demonstration with a fresh small set before showing the model again.
