WELCOME TO OUR LEARNING CLUB

Meet your new friends

Read with an adult. Then tell us something about you!

Aishatu

The toy maker

Hello! I'm Aishatu. I live in Gombe town.

My cousins and I make cardboard toys. Sometimes I rush! I am learning to stop and check.

Come and make something with me!

Adamu

The storyteller

Hi! I'm Adamu. My family comes from Dukku.

I love stories and games. Sometimes I guess too soon. My friends help me check.

Come and play! Everyone gets a turn.

What do you like to make or play?

WELCOME TO OUR LEARNING CLUB

More friends to meet

Read with an adult. Then tell us something about you!

Grace

The careful explorer

Hello! I'm Grace. My family comes from Billiri.

Grandfather and I keep a notebook. We draw things we notice. A mistake can teach me something!

What can we discover together?

John

The puzzle maker

Hi! I'm John. My family comes from Yamaltu/Deba.

I draw places and make puzzles. I use a wheelchair. I am learning to ask for help.

Bring your ideas. Let's solve a puzzle!

You belong here too. Let's learn and help one another.

CHAPTER 1 / A PROBLEM TO SOLVE

One to five

Count, read, write and order 1 to 5.

Aishatu wants to make a counting game for the club.

Aishatu: Let's count the counters for our game!

Adamu: I keep losing my place.

Grace: Touch one. Say one number.

John: Move it onto the mat. We can check together!

Your turn Take three large counters.
How can you count each one just once?

LEARN / TRY WITH COUNTERS

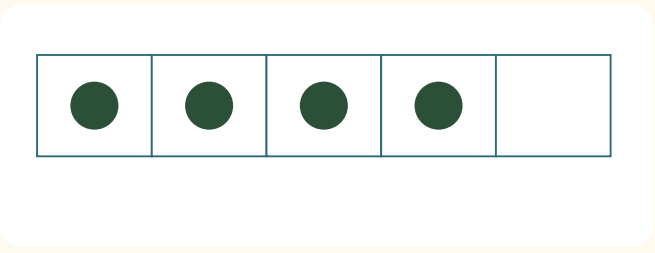

Touch. Move. Say.

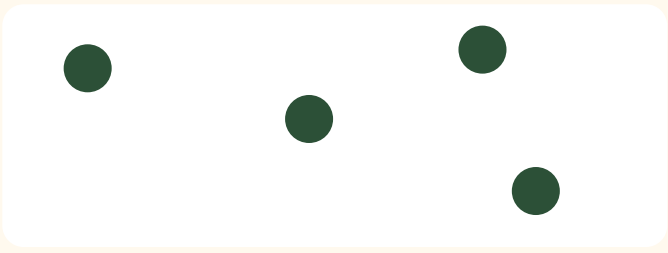

Move one counter at a time. Say one number for each counter.

	To count	On the mat
1. Say "one".	● ●	●
2. Say "two".	●	● ●
3. Say "three".		● ● ●

Three is the last number said.
There are 3 counters. The number 3 tells how many.

Try 4 counters. Move them.

How many in each picture? Did moving them change how many?

Read the numbers with a partner.

1 2 3 4 5

PRACTISE / QUESTIONS 1 TO 4

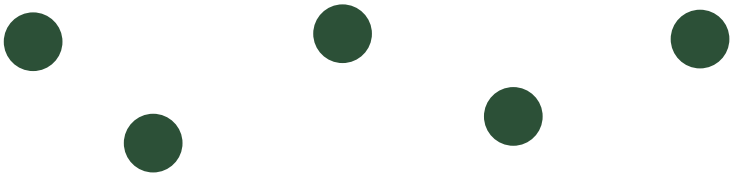

Count, draw and write

Name: _____ Date: _____

1. Count row A. Write the number.

A 

2. Count the dots in box B. Write the number.

B 

3. Draw 2 circles.

4. Write 1 to 5 in order.

Trace the models. Then write your own row below.

1	2	3	4	5

PRACTISE / QUESTIONS 5 AND 6

Show it. Fix it. Try it.

You can speak, point or move counters to explain your idea.

5. Show 4 fingers. How many?

Write how many: ☐

6. Adamu counts one counter twice. Show a better way.

The ring shows where he touches.
Each picture shows the same counters.

Touch 1

"one"

Touch 2

"two"

Touch 3

"three"

Touch 4

"four"

Point to the counter he counted twice.
Now use counters. Show a better way.

Show Grace what you know

Give Grace 4 counters.
Then point to 1, to 2 and to 4 below.

3	1	5	2	4

TEACHER / KEEP WITH THE CHAPTER

Notice and help

Read aloud, observe the action and choose the next step.

Prepare: five large, clean counters and a mat. Supervise; use pieces too large to swallow. Read introductions and story together. A pupil may point, speak or move objects; assess handwriting separately. Family settings are fictional.

Answers
1: 3. 2: 5. 3: Two separate circles. 4: 1, 2, 3, 4, 5. 5: 4.
6: The middle counter is touched twice. Touch or move each counter once; the correct total is 3. On page 4 both pictures show 4.

Fresh check (page 6)
Without showing a model set, ask for 4 counters. Then ask the child to point to 1, 2 and 4 in the shuffled cards. Record each response as independent / with help / not yet. Correct copied numbers alone do not establish recognition.

If you notice this, try this

A counter is skipped or counted twice.
Move one counter onto the mat for each number said.
Recheck: Give a fresh set of 2, then 3. Watch each move.

The child counts but cannot say how many.
Repeat the last number: 'Three. There are three.'
Recheck: Count a fresh set and ask 'How many altogether?'

Numerals are copied but not recognised.
Match a small set to its number card. Say the number.
Recheck: Shuffle the cards. Ask for 1, then 2, then 4.

Another day: Ask the child to give John 5 counters. Spread them out. Ask how many again. Offer the mat method if needed.
Ready for more? Make two different arrangements of 5. Explain why both have 5.
